

CiNii Books is a service that provides information, which has been accumulated by NACSIS-CAT, on books and journals that are held in university libraries in Japan. In addition to recent books, you can also search for resources such as classical documents, western books, CDs and DVDs

●Features●

- Searches can be performed on a large collection of books, journals and holding data.
- Searches on holding libraries can be refined by ILL availability and area.
- Through joint collaborations, we also provide links to navigate to other services.

Simple search

[A-1]

Searches can be performed easily by inputting keywords. Searches target registered information like the title, author name, publisher, ISBN, ISSN, NCID and/or author ID.

[A-1] Searches can be refined.

“Books and journals”

⇒ Searches all books and journals

“Books”

⇒ Searches books (includes CDs and DVDs)

“Journals”

⇒ Searches periodicals

Advanced search

[B-1]

Clicking “Advanced” displays the advanced search input field.

With the advanced search, desired searched categories can be specified.

[B-1] There are input fields for title, author name, author ID, uniform title ID, publisher, ISBN, ISSN, NCID, subject, classification, note, format, language, year of publication library ID, organization ID and area. Additionally, multiple conditional search relationships (logic operators) can be used.

◆Search technique◆

➢ No distinction is made between numbers, upper- or lowercase letters, Japanese full-width or English half-width characters.

➢ Searches using OR or NOT between categories cannot be performed.

【Search using “AND”】

Search for records containing all entered keywords. Specify using spaces (English half-width spaces or Japanese full-width spaces) or “_&_” (where _ is a space, as in the example below).

Example: Inputting “information digital” or “information & digital” returns search results for records containing both “information” and “digital”

【Search using “OR”】

Search for records containing any of the entered keywords. Specify using “_OR_” (**OR must be written in English half-width, uppercase characters**) or “_|_” (where _ is a space, as in the example below.)

Example: Inputting “information OR digital” or “information | digital” returns search results for records containing either “information” or “digital” or both.

【Search using “NOT”】

Search for records containing the entered keyword(s) but excluding the keyword after NOT. Specify using “_NOT_” (**NOT must be written in English half-width, uppercase characters**) or add “_-” (where _ is a space and - is an English half-width hyphen) after the main keyword(s) but before the term to be excluded.

Example: Inputting “information NOT digital” or “information -digital” returns search results for records containing “information”, excluding those records that contain “digital”.

【C-1】It is possible to further refine the search by adding keywords.

【C-2】You can choose to output the search results by opening a new window or displaying Refer/BibIX ”.

[C-3] The number of books displayed per page can be set to 20, 50, 100, or 200. Additionally, the sorting order can be set by year of publication (ascending/descending), number of holding library (ascending/descending), or title (ascending/descending/relevance).

【C-4】 Clicking the title takes you to the details page for that entry.

【C-5】 Author name, publisher, publication year, edition, series title, series number, volume/number, format and the number of holding libraries are displayed.

[C-6] The author names included in the search results are listed. After clicking an author name, the original search will be performed again with that author name as an advanced search parameter.
