

CiNii Dissertations allows you to search, in a centralised way, Japanese doctoral dissertations held and digitised by the National Diet Library, as well as the doctoral dissertations held by each university's institutional repository.

●Features●

- Searches can be performed on an exhaustive collection of dissertations.
- Through joint collaborations, we also provide links to navigate to other services.
- CiNii provides Web API (Application Program Interface) for system linkages.

## CiNii Dissertations top page

### Simple Search

【A-1】

Searches can be performed easily by inputting keywords. Searches target registered information like the title, note and description, author, university, grant ID, types of degree, degree year.  
**【A-1】** Searches can be refined.  
 "All" ⇒ all dissertations are searched.  
 "Full-text exists" ⇒ searches for full text documents.

### Advanced Search

【B-1】

Clicking "Advanced Search" displays the advanced search input field. With the advanced search, desired searched categories can be specified.  
**【B-1】** There are input fields for title, author, grant ID, university, etc. Additionally, multiple conditional search relationships (logic operators) can be used.

#### ◆Search technique◆

- No distinction is made between numbers, upper- or lowercase letters,
- Japanese full-width or English half-width characters.
- Searches using OR or NOT between categories cannot be performed.

#### •【Search using "AND"】

• Search for records containing all entered keywords. Specify using spaces (English half-width spaces or Japanese full-width spaces) or " \_ & \_ " (where \_ is a space, as in the example below).

• Example: Inputting "information digital" or "information & digital" returns search results for records containing both "information" and "digital"

#### •【Search using "OR"】

• Search for records containing any of the entered keywords. Specify using " \_OR\_" (**OR must be written in English half-width, uppercase characters**) or " \_|\_" (where \_ is a space, as in the example below.)

• Example: Inputting "information OR digital" or "information | digital" returns search results for records containing either "information" or "digital" or both.

#### •【Search using "NOT"】

• Search for records containing the entered keyword(s) but excluding the keyword after NOT. Specify using " \_NOT\_" (**NOT must be written in English half-width, uppercase characters**) or add " \_-" (where \_ is a space and - is an English half-width hyphen) after the main keyword(s) but before the term to be excluded.

• Example: Inputting "information NOT digital" or "information -digital" returns search results for records **containing** "information", excluding those records that contain "digital".

**Tip icons** <Dissertations> <author>

## Article search results list

**[C-1]** Search bar containing the keyword "library".

**[C-2]** "Open in New Windows" dropdown menu.

**[C-3]** "Show 20 results" and "Year (newest)" sorting options.

**[C-4]** Title of the article: "Effects of Radiation on Spiral Dura Mater and Surrounding Tissue in Mice".

**[C-5]** Abstract snippet: "... with tRNA through aminophenylalanine and the tRNA was added during preparation of random sequence peptide library for ribosome display. By introduction of NBD as a side chain of non-natural amino acid into a library of random sequences, I successfully obtained fluorescent signaling peptide aptamers and investic ..."

- [C-1]** When a keyword is added, it is possible to further refine the search.
- [C-2]** You can choose to output the search results by opening a new window or showing "Refer/BibIX".
- [C-3]** The number of articles displayed per page can be set to 20, 50, 100, or 200. Additionally, the sorting order can be set using the year of publication (ascending/descending) and title (ascending/descending/relevance).
- [C-4]** Clicking the title takes you to the details page.
- [C-5]** Author, university, grant ID, types of degree and degree year are displayed.

## Details display page

**[D-1]** Title: 設計過程モデル論

**[D-2]** Access buttons: Institutional Repository, NDL Digital Collections

**[D-3]** Bibliographic Information table:

Title	設計過程モデル論
Author	武田, 英明
Author (Another name)	タケダ, ヒデアキ
University	東京大学
Types of degree	工学博士
Grant ID	甲第0011号
Degree year	1991-03-23

**[D-4]** Note and Description: 博士論文  
報告番号: 甲00001; 学位授与年月日: 1991-03-23; 学位の種類: 課程博士; 学位の種類: 工学博士; 学位記番号: 精工第0042号; 研究科・専攻: 工学系研究科精密機械工学専攻

**[D-5]** Table of Contents:

- 目次 / p5 (0005.p2)
- 1 序章 / p1 (0001.p2)
- 1.1 本研究の目的 / p3 (0003.p2)
- 1.2 本研究の構成 / p5 (0010.p2)
- 1.3 設計の過程と設計研究の方法論 / p7 (0011.p2)
- 2 設計実験方法論 / p18 (0014.p2)
- 2.1 設計実験に関する議論 / p15 (0015.p2)
- 3 結論と今後の展望 / p28 (0025.p2)

**[D-6]** 7/3 access

**[D-7]** Facebook and Twitter share buttons

**[D-8]** Image of the dissertation cover

**[D-9]** Codes table:

NI Article ID (NAID)	00000001749
NI Author ID (NAID)	000000001987
DOI (DOI)	10.11501/2053910
Text Lang	ja
NDL&ID	00000246063
Source	Institutional Repository NDL-OPAC NDL Digital Collections

**[D-10]** Export options: Export to RefWorks, Export to EndNote, Export to Mendeley, Show Refer/BibIX, Show RIS, Show BibTeX, Show TSV

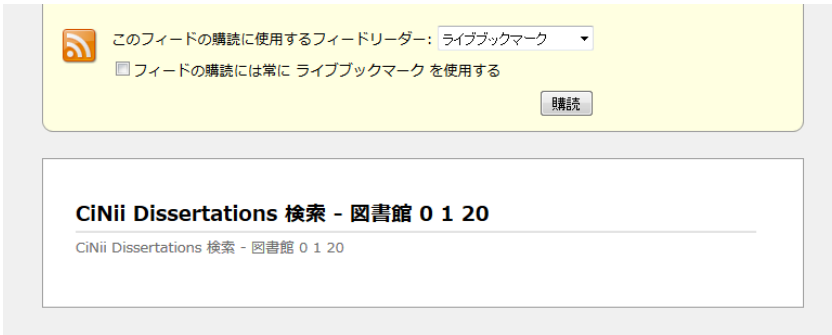

**[D-11]** Report a problem button

- [D-1]** Title, author and the transcription of the author are displayed in Japanese Kana.
- [D-2]** Orange button is displayed when the dissertation is hosted by Institutional Repository or NDL Digital Collections.
- [D-3]** University, grant ID and types of degree are displayed.
- [D-4]** Note and Description are displayed.
- [D-5]** Table of Contents are displayed.
- [D-6]** Access times for full-text link is displayed.
- [D-7]** Information of the dissertation can be shared on Facebook and Twitter.
- [D-8]** An image of the dissertation is displayed when available.
- [D-9]** The following details are displayed: DOI, text language code, NDL Bibliographic ID, etc.
- [D-10]** Bibliography information for the article is written in "Refer/BibIX", "BibTeX", and "Tab Separated Values (TSV)" formats.
- [D-11]** You can report a problem from here.

OpenSearch

[E-1]

Using OpenSearch

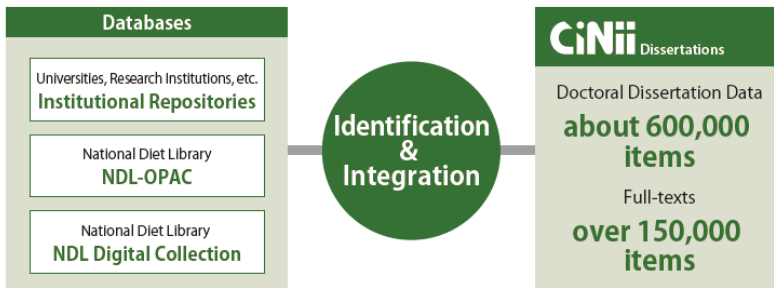

[E-1] By creating an OpenSearch query and registering it to an RSS reader, you will be able to easily obtain the latest information of articles in the field of interest. The OpenSearch query format is as follows:  
[http://ci.nii.ac.jp/d/search?\(parameter=value\)&...](http://ci.nii.ac.jp/d/search?(parameter=value)&...)

[E-2] Search for articles without accessing the top page of CiNii by selecting "CiNii OpenSearch" on the browser search bar and entering keywords.

[E-2]

The big picture / Inquiries

CiNii Dissertations identifies and integrates exhaustive collection of dissertations.

We hope to continue to improve our service so that our users can comfortably navigate our site and locate the resources they need.
